10. Unusual foreign body in pulp canal extending beyond the apex. Universal Research Journal of Dentistry. May-Aug 2013; 3(2): 87-90
11. Correlation between c.albicans, s.mutans, s.sanguinis and lactobacillus in ecc, s-ecc and caries free children. International Journal of Recent Scientific Research 2014; 5(2): 352-6.

Research in the review process in various journals:

1. Oral health for holistic health- Medical student's knowledge and attitude about infant oral health.
2. Evaluation of knowledge and attitude of expecting mothers about infant oral health and their oral hygiene practices in Mangalore city
3. Association between salivary s-IgA levels and severe early childhood caries.
4. Comparison of antimicrobial efficacy of chlorhexidine, sodium fluoride, fluoride with essential oils, alum, green tea and garlic with lime mouth rinses on streptococcus mutans, lactobacilli and candida albicans.
5. Sturge weber syndrome- a case report.

Current ongoing research projects:

1. Comparative analysis of Streptococcus Mutans count, Candida Albicans count and Salivary s-IgA levels in children with severe early childhood caries and caries free children.
2. Candida albicans forms and its acidogenic potential in ECC and S-ECC; and the relationship between candida albicans, streptococcus mutans, streptococcus sanguinis and lactobacilli levels in ECC and S-ECC.
3. Comparing streptococcus mutans, lactobacilli and candida albicans count changes following chlorhexidine (0.2%) mouth rinse, sodium fluoride (0.05%) mouth rinse, green tea mouth rinse and garlic with lime mouth rinses in children.
4. Evaluation of non-surgical periodontal therapy with adjunctive chlorhexidine varnish and chlorhexidine gluconate gel in children with Down's syndrome.
5. Comparative evaluation of visual pedagogy with or without auditory stimulus as an aid to augment tooth brushing in children with autism spectrum disorder.
